

Christmas Warning From Moms Who Care

STOP HURTING OUR KIDS -- www.shokbikes.org

We are the parents of children who have been injured on bikes purchased at Wal-Mart and/or made by Dynacraft. Our sons and daughters have suffered permanent scarring, disfigurement, major bone and dental trauma, severe scraping and bruising, brain injury and ruptured internal organs. We have:

- Evidence of over 100 accidents
- Evidence of brain damage to children
- Evidence that accident reports were "thrown away" by Wal-Mart claims people

Some of us are currently involved in a group lawsuit against Wal-Mart and their distributor Dynacraft, and we intend to prove in court that:

- *WAL-MART KNEW these bicycles were causing serious injuries and refused to act*
- *WAL-MART CONSPIRED with its importer Dynacraft to cover up these incidents & keep the problem hidden*

In order to protect all children nationwide and to make a statement against corporate greed and public victimization, we are asking all parents and families:

Don't buy bikes from Wal-Mart.

As the world's largest seller of children's bicycles, Wal-Mart should ensure the safety of bikes they sell. Until Wal-Mart accepts full responsibility for the multiple accidents on their bikes, and ensures the public that they've stopped selling defective bikes, consumers should purchase their bikes elsewhere, preferably a local bike shop that can offer expert advice and personalized service. Bikes are not toys!

Please pass this on to every parent you know. According to the National Retail Federation, bicycles are one of the Top 10 Gifts for Boys during the holiday season. Let's save children from needless injury and hit Wal-Mart where it hurts until they Stop Hurting Our Kids!

CONCERNED FAMILIES

Cindy Mary-Carman — San Jose, CA
Roxanne Berry — South Charleston, WV
Brian & Stacy Anglen — Chiecotah, OK
Cheryl & Kim Abplanalp — Vernal, UT
Carla Baird — Chuluoata, FL
Connie Gowawn — Slidell, LA
Cathy Belyeu — Dallas, TX
Sandy Huber — West Chicago, IL
